Aintzane Iglesias Manterola

Frontend Developer

✉ aintzz.im@gmail.com   ⬈ aintzz.com

Hey there! I'm a Frontend Developer with a strong focus in UX/UI design, specializing in building responsive, high-performance web applications using frameworks like React. Skilled in translating user research into intuitive interfaces, integrating APIs, and delivering pixel-perfect designs.

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, GraphQL, Responsive Design

Backend: Python, PHP

Design: Figma, FigJam, Miro, Adobe Suite

Tools: Git, GitHub, Jira, Agile, Bundlers (Vite)

PROFESSIONAL EXPERIENCE

Product Engineer — Payfit (2022 — Present)

- Designed and developed user-centered, responsive web features for the Spanish market

- Reviewed pull requests on GitHub to ensure high-quality, maintainable code

- Conducted user research through interviews and surveys to inform intuitive UI design and development decisions

- Collaborated closely with product designers, product managers, and engineers in Agile teams using Jira, actively participating in sprint planning, daily stand-ups, and retrospectives

- Developed and maintained Python automation scripts to support Customer Support with data analysis and improve workflows

Projects of interest:

  - Built a retroactive payroll calculation system for collective agreement updates, reducing payroll-related support tickets

  - Created a sick leave integration with the Spanish Social Security system, resolving the top customer satisfaction pain point and improving overall satisfaction scores

  - Contributed to the design and front-end implementation of a new payroll template UI that enhanced payslip clarity and user comprehension

  -Led regression testing for every deployment in the Spanish market, ensuring consistent functionality and quality

Fullstack Engineer — La Fábrica de Sombreros (2018 — 2022)

- Developed and maintained multiple websites for brands like Chupa Chups, Smint, and Mentos using technologies such as React, Javascript, Typescript, Laravel, WordPress, and Shopify

- Delivered pixel-perfect, responsive designs for product launches, improving brand consistency and visual engagement

- Optimized site performance, improving Core Web Vitals scores and reducing average page load times using tools like Lighthouse

- Led end-to-end project workflows: requirements gathering, competitor analysis, UX wireframing, prototyping, development, and deployment.

Projects of interest:

  - Developed a custom complaints system in React + WordPress, enabling clients to file complaints against defaulters. The system automatically filed a legal demand through an API integration with the government platform

  - Maintained and enhanced the front-end of multiple brand websites such as Chupa Chups, Mentos, and Smint, implementing new features to improve responsiveness, performance, and user engagement

Fullstack Engineer — Finanzarel (2016 — 2018)

- Developed a PL/SQL-based marketplace auction system, enabling investors to bid on client bills in real-time

- Built the company's marketing website and blog with a custom WordPress theme

- Collaborated with marketing to optimize the acquisition funnel and execute targeted newsletter campaigns
